

Website Template Partial (Navigation Bar):

- HTML (Title/Logo, User Acc, Links: Dashboard, Calendar, Stats, Friends, Settings)
- JS Routing (On click of all tabs and user acc, conditionally navigate to page)
 - If logged in, open page clicked, else open login page
- As a user...navigate to Dashboard
- As a user...navigate to Calendar
- As a user...navigate to Stats
- As a user...navigate to Friends
- As a user...navigate to Settings
- As a user...navigate to Account Page

Login Page:

- HTML (Include Nav Bar Partial, Include form entry for Username, Email, Password)
- JS Routing (/login GET request to display HTML, On submission of form route to /login POST request and verify user exists in DB, if not, redirect to /register page)
- As a user...enter username, password, and email
- As a user...notified when information is incorrect or need to register
- As a user...navigate to Dashboard after logging in successfully

Registration Page:

- HTML (Include Nav Bar Partial, Include form entry for Username, Email, Password)
- JS Routing (/register GET request to display HTML, On submission route to /register POST request and add user to DB make sure to hash password (project requirement), make sure username/email is not already in use)
- As a user...enter username, password, and email
- As a user...notified when information is incorrect (username taken)
- As a user...redirect to login page after registering

Dashboard ("Home") Page:

- TBD (Need to decide on what will be shown here as most functionality is done elsewhere)

Calendar/My Habits Page:

- HTML (Include Nav Bar Partial, Include button with modal pop up to add new habit, spitballing here but added habits could be placed on calendar and can be clicked to pop up all extra information related to habit as well as buttons that turn on/off notifications)

- JS Routing (/myHabits GET route to display HTML, /addHabit POST route to add habits from pop-up modal, modal pop-up on click functionality)
- As a user...be able to add habit by clicking on “add habit” button
- As a user...be able to enter information into modal form to add habit (habit name, when, notify?)
- As a user...be able to click on existing habits on calendar to see full habit information and/or edit habit info

Statistics Page:

- TBD

Friends Page:

- TBD

Settings Page:

- TBD
